SharePoint Forms Master Class

Take your InfoPath knowledge to the next level, become an InfoPath Master

Our intermediate-to-advanced class is meant to take current users of InfoPath to a higher level of form design and integration. Learn how to create codeless form solutions that minimize administrative costs and maximize the value of InfoPath within your organization. Learn how to create an InfoPath form factory- easily go from 5 to 50 forms, but without spending 10x the effort.

Our hands-on approach allows you to master key concepts and techniques with an InfoPath expert to guide you along the way. Take the next step in becoming an InfoPath Master!

This Master Course covers:

• End-to-End InfoPath Solutions	• Improving Quality of Data Input
• Large Scale InfoPath Solutions	• Codeless Solutions
• Browser-Based Forms	• Forms Versioning
• Administrative Tools for InfoPath	• High Impact Design
• Schema Design and Form Files	• Multiple Form Solutions
• Using InfoPath as a Data Bridge	• Advanced Browser Forms

Upon completion of this course, you will be able to:

- Create forms with multi-user views, professional design elements, and customized task panes/ toolbars
- Use rules and conditions instead of code to provide a form solution with low administrative overhead
- Integrate forms to SharePoint using content types and form versioning
- Create browser-enabled and mobile-enabled forms
- Use InfoPath forms to consume data from other applications
- Perform complex data validation to make user input more valuable
- Have working knowledge of schema best practices and can design a data source from scratch
- Create a simple search tool using InfoPath administrative tools
- Achieve familiarity with how forms interact with each other

Incomparable Value

Exclusive to this class, you will receive:

- Download access to all course content - presentations, hands-on labs, and samples
- Access to video recordings for future reference (online class only)
- Qdabra's DBXL Services Beginner license — easily report on your InfoPath form data ($845 value)
